

Stylish design

This is a cooling range that combines unique innovation with stunning appearance. Key new design elements have been introduced to the cooling range; new LCD displays, water through the door, stylish integrated handles and a range of finishes are available including stainless steel and silver with fresh blue interior.

Stay cool.

The Electrolux refrigeration range has the perfect solution for your food cooling needs. Our stylish models are packed with innovative storage solutions and practical features to ensure that your food stays as fresh as possible.

Electrolux offer something for everyone, including a range of feature packed fridge freezers, the latest technology chest freezers and American style fridge freezers.

All models have outstanding features. To make it easy for you to find a suitable model we have divided our range into three - the premium Insight, mid-range Inspire and value for money Intuition.

Features

There are a range of storage options available across the Electrolux cooling range, including:

Unique extra large salad and vegetable drawer - for fresh food storage

With convenient carrying handles for easier loading and unloading and easy glide runners for ease of use and for a quality feel. The freshness control and humidity mats within the drawers also ensure the moisture stays away from the food keeping items fresher for longer.

Chilled food compartment

Keep your food fresher for twice as long in the chiller compartment. The nutritional value and colour is preserved ensuring healthier and more attractive food.

Space saving bottle racks

The ingenious design of the bottle rack ensures it tucks under one of the glass shelves to save space and provide better storage flexibility for smaller items. It also allows you to store bottles of wine horizontally so that it is kept in the best possible condition.

LCD display

The new electronic controls with digital displays through the door are clear and visible, easy to use and understand and with their attractive design will look completely at home in your kitchen.

Intelligent cooling technologies

Freestore

Freestore temperature control ensures you have an even temperature throughout your fridge to provide safe and convenient food storage on all shelves. The temperature is automatically maintained to + or - 1ºC giving you total peace of mind. Your food is protected from bacterial growth and kept fresher for longer.

Frost Free

Frost Free technology means there's no need to defrost your freezer again. You can maximise your storage space, there's no build up of ice in the freezer, and labels will stay readable. You can simply forget about the problems of defrosting and spend time on more exciting activities.

Energy Efficiency

Most of our models are 'A' rated for the very best efficiency, and many are A+, which means they use 25% less energy than other A rated products, saving you money on your running costs.

Functions

Super cool function

Activating the super cool function lowers the temperature of the fridge in preparation for the addition of fresh (and warm) food. Ideal for use when adding shopping.

Fan Cooling System

Powerful ventilation within the fridge ensures that there are no hot spots, less humidity, less condensation build up and quicker cooling times. This all means that your food stays fresher for longer.

Air Filter

Air within the fridge goes through a charcoal filter. This removes small particles from the air - resulting in a cleaner, fresher smelling fridge and less transfer of smells between foods.

Auto fridge defrost

To ensure that you never have to defrost the ice from inside your fridge, it automatically goes through a defrost process to ensure this ice melts off the back wall.

Fast Freeze function

Adding fresh food to the freezer can lead to a warming of temperature. To ensure that the freezer remains as cold as possible, and to allow for quick freezing of fresh food, then the fast freeze function should be used. This rapidly lowers the temperature in the freezer, in preparation for additional fresh food.

Temperature alarms

To ensure that you are aware of any problems with your appliance, many models will sound an alarm if the internal temperature rises to an unacceptable level. This is a perfect way of letting you know if there have been any long term power cuts.

Halogen lighting

Halogen lighting in your fridge gives you brighter light than standard interior bulbs. This will allow you to easily see what is stored in your fridge.

Fresh filtered water on tap.

The Electrolux range of ‘A’ rated frost free fridge freezers with integrated BRITA® filter cartridge for fresh tasting and perfectly chilled water.

Electrolux has overcome the space problem of chilling big jugs of filtered water by introducing a range of highly specified fridge freezers with a 4 litre Brita water system integrated neatly inside the fridge door.

As well as an endless supply of delicious chilled tap water, the other major benefits are cost savings - just 4p a litre - a fraction of the cost of bottled water - and you won’t need to lug heavy bottles from the shop or have the problem of disposing of empty bottles.

The 4 litre water tank is not plumbed in, but filled manually, so you can locate the appliance where you want, rather than where the water pipes are!

The easy to use, water dispenser has been designed to accommodate glasses and a variety of jugs or larger containers.

Each BRITA® filter will process up to 150 litres of water before it needs changing.

We were thinking,
what could be better than water chilled by Electrolux and filtered by BRITA®?

The Fridge Freezer with BRITA filtered water. Not only do we give you cool water from the door, we also make sure that it's fresh, filtered water - thanks to BRITA. We use their best ever filtration technology, the MAXTRA cartridge, which removes undesirable elements like chlorine, lime-scale and other impurities like copper and lead. The water container has a 4-litre family-size capacity and the dispenser works for jugs as well as glasses. Suddenly it has become so much easier to enjoy lots of fresh filtered water.

Store even more food.

Chest Freezers give you the ultimate solution for food storage.
The Electrolux range of chest freezers is packed with technology and includes models to suit everyone’s needs.

Frost Free

Never defrost your freezer again! Eliminates the build up of ice on food and on the freezer interior.

Low frost technology

Low frost technology significantly reduces the build up of ice giving you up to 5 years without defrosting.

Suitable for the garage

Our concealed condenser enables flexible positioning. The freezer can be stored in the garage or cellar without condensation forming on the appliance. They are also quieter!

New illuminated lid

Internal lighting makes loading and unloading much easier.

New easy mobility wheels

Makes cleaning and positioning much easier.

Stackable baskets

Baskets can be stacked on top of each other, creating a flexible storage solution.

Easy access

The lid has a vacuum release valve which enables the lid to be opened more easily.

Visual and audible alarm

If the internal temperature rises suddenly, the alarm will sound. Ideal if the appliance is stored out of the kitchen.

Easy to use electronic controls located on the lid

Comfort at your fingertips, with the easy to open lid and accessible visible controls on the handle. The large digital display is easy to read with clear symbols to indicate the actual temperature displayed, and what feature you are selecting, such as quick chill or child lock. It even chills your drinks at the touch of a button. In the event of a power failure our chest freezers keep food colder for longer.

Energy Efficiency

With our A+ energy rating on top of the range models you can save yourself 25% less energy, which means savings on your running costs.
